CAREER OBJECTIVE

B.Tech Computer Science & Engineering (AI & ML) student with a strong foundation in Python, Data Structures & Algorithms, and Machine Learning. Experienced in building AI-powered, full-stack applications—including a retail analytics platform that integrates Computer Vision, object detection, and behavioral analytics. Proficient in developing end-to-end ML pipelines, designing scalable backend services with FastAPI, and applying deep learning to real-world datasets. A dedicated problem-solver seeking impactful opportunities in AI/ML Engineering, Computer Vision, and Software Development.

ACADEMIC PROJECT PROFILE

PROJECTS COMPLETED:

- **Consumer Attention Mapping System**
  - Built an AI-powered retail analytics platform using computer vision to track shopper attention, gaze direction, and dwell time on store shelves.
  - Developed a product interaction and shelf engagement engine to detect pickups, returns, and product comparisons in real time.
  - Designed a weighted scoring model to calculate product attractiveness using attention duration, pickup rate, and conversion rate.
  - Implemented role-based dashboards (Store Manager, Retail Analyst, Marketing Manager) and deployed the system using Docker on AWS/Azure.
- **Medical Image Captioning using Deep Learning**
  - Developed a hybrid deep learning model combining CNNs and LSTMs in TensorFlow/Keras to automatically generate diagnostic text captions for radiology images.
  - Processed a large-scale dataset of 73,000+ image-caption pairs (ROCO dataset), utilizing OpenCV for image normalization and NLTK for text tokenization.
  - Engineered a visual feature extraction pipeline using transfer learning with pre-trained VGG16 and ResNet50 models to capture complex medical imaging features.
  - Evaluated caption generation performance using quantitative NLP metrics (BLEU, ROUGE, METEOR), optimizing the decoder for accurate medical terminology.
- **XAI-BioSign: Explainable Ensemble Framework for Multi-Omics Biomarker Discovery (In Progress)**
  - Developing an explainable AI framework that applies ensemble learning on multi-omics datasets to identify interpretable biomarkers for disease classification.

EXPERTISE:

- **Core:** Python, SQL, Data Structures & Algorithms
- **Machine Learning & AI:** Supervised & Unsupervised Learning, Traditional ML Algorithms, Scikit-learn, Pandas, NumPy, YOLOv8, ByteTrack, MediaPipe, Deep Learning, NLP
- **NLP & LLM Tools:** Prompt Engineering, Google Gemini API, Transformers
- **Backend & Tools:** SQL, Database Normalization, SQLAlchemy, PostgreSQL, Git/GitHub, Jupyter, VS Code

TRAINING/INTERNSHIP DETAILS:

- **Data Analyst Intern | Layvia Solar Energy (July 2026 – Present)** — Analyzing sales, leads, customer, and demand data to identify trends, patterns, and actionable business insights. Performing data cleaning, exploratory data analysis, visualization, and reporting to support sales forecasting, lead conversion analysis, customer segmentation, and demand planning.
- **Infosys Springboard Virtual Internship 7.0 (2 Months)** — Currently participating in a comprehensive virtual internship program, gaining practical experience in software development practices and industry-standard technologies.

PERSONAL DETAILS

- **DATE OF BIRTH:** 04/02/2006
- **GENDER:** Male
- **NATIONALITY:** Indian
- **MARITAL STATUS:** Unmarried
- **Extra-Curricular Activity / Volunteer Work:**
  - Technical Educator on YouTube (Channel: TechNerd Ajeet)

OTHER INFORMATION

LANGUAGE KNOWN: English, Hindi

HOBBY: Playing cricket, Badminton, interest in Geopolitics

AWARDS (IF ANY):

- 3rd place in shot put, college level Athletics
- Secured 2nd prize in Tug of War during Fit India Week 2023 Celebrations at GKCIET, Malda

DECLARATION

- I hereby declare that all the details furnished above are true to the best of my knowledge and belief.
